

**KELCO® THANATECH® SKIN SEAL LIQUID PORE SEALER**

Easy to apply brush-on liquid creates a “second skin” layer over sutured or glued incisions, lacerations, puncture wounds, etc; tissue areas must be completely dry to ensure a thorough seal. Provides an extra leakage barrier when applied over extensively sutured areas such as thoracic/abdominal autopsy or surgical cases. Liquid or cream cosmetics and restorative waxes may be applied over the sealed tissue area(s). Dry or wet excess sealer can be removed with Kelco® Thanatech® Solvent which may be purchased separately. Optional Cap & Brush Applicator Bottle may be purchased separately (see right). A hazardous materials charge may apply.

- 49549** 8 oz.
- 49557** 16 oz.

**KELCO® THANATECH® SOLVENT**

Removes excess dry or wet Kelco® Skin Seal Liquid Pore Sealer or Kel-Tissu-Fil. 8 oz. A hazardous materials charge may apply.

**50644**

**CAP & BRUSH APPLICATOR BOTTLE**

Pour Kelco® Skin Seal Liquid Pore Sealer into the 16 oz. bottle and there will always be a handy applicator brush right at your fingertips.

**EMBALMERS PATCH**

A product to seal bodies and protect deathcare providers from fluid exposure. This unique, patent-pending product offers a primary line of defense against post-mortem fluid leakage and odor. Ideal for incisions, skin-slip, IV openings and hard-to-cover areas that plastic garments can't reach. The patch is a high-elongation barrier film with an adhesive backing designed to seal around contours and contain leakage. Ideal for use with the Enviro-sorb™ Super-Absorbant Material #577493 (see right). 10/pk. 6" Sq. patches.

**577485**

**ARON ALPHA ADHESIVE**

Rapid drying cyanoacrylate liquid adhesive is ideal in a variety of delicate or heavy-duty applications; bonds skin instantly. Five 2 gram (.07 oz.) squeeze vials in storage base and cover.

**47881**

**KELCO® CLEAN-UP SOLVENT**

Acetone compound removes any type of dried adhesive in seconds; eyedropper applicator in bottle cap makes use clean, easy and efficient. 1 oz. bottle with eyedropper applicator cap.

**140856**

**TRANSPARENT SURGICAL TAPE**

Designed to provide extra strength to sutured incisions while remaining virtually unnoticeable. Also useful in securing small incisions and lacerations. The skin-like texture is easily manipulated into position.
