

A. DISPOSABLE HEAD & BODY POSITIONER
High grade polystyrene. Sold individually or in cases of 24.
5.875"L x 4.25"W x 4.75"H.
478903

B. MULTI-BLOCK BODY POSITIONER
Sold individually; constructed of high impact plastic.
11.875"L x 5.375" W x 1"H.
526908

C. ARM & HAND HOOK POSITIONER
Satin finish aluminum hooks attached to an adjustable nylon belt for secure positioning of hands, wrists, forearms and upper arms.
140902

D. ADJUSTO-BLOCK HEAD & BODY POSITIONER
High density, non-marring rubber.
6.5"L x 4.25"W x 5.25"H.
5517

E. BASIC HEAD & BODY POSITIONER
High impact plastic. 6.375"L x 4.5"W x 5"H.
547638

F. WRIST & HAND LOOP POSITIONER
Nylon straps with adjustable Velcro® loops to secure and position wrists and hands; string-slide locking mechanism establishes desired tension for proper positioning.
516031

G. ADJUSTABLE CHIN SUPPORT
Place unit between chin and collar bone; tip guards.
424374

SOFT PREP-EASE BODY SUPPORTS
Grip the table like rubber, but are chemically resistant; can handle rinsing with solvents.

H. 356151 Wedge: 12"L x 5.5"H
I. 356143 Blocks: 5"L x 4.5"H

J. DISPOSABLE POSITIONERS
Constructed of high grade polystyrene; interlocking design allows stacking several units together to achieve desired height for proper positioning. 12/pk. 8"L x 3"W x 2.5"H.
478898

A. CRANIAL CAP
Absorbent cap is contoured to fit snugly against an autopsied or traumatized cranium; helps protect casket fabric and clothing from leakage.
82821

B. SCREW SKULL CLAMPS
Secures calvarium to cranial bone structure using a vice-like screw mechanism made of poly-coated steel. 20/bag.
408484

C. MORGAN EYE CAPS
Oval shape. 144/box.
426 Large
434 Small

D. PERFECTION EYE CAPS
Round shape. 24/box.
388 Large
396 Small

E. NATURAL EXPRESSION FORMER
Holes facilitate passage of injector needle wire ties or ligature for proper mouth closure; 12/box.
83356

F. DENTAL SIMULATOR
Perforated for convenient and accurate sizing with a few scissors snips; holes facilitate passage of injector needle wire ties or ligature for proper mouth closure; 12/box.
42498

G. MANUAL INJECTOR NEEDLE GUN PISTOL GRIP
Attaches to manual injector needle gun to provide a more secure, controlled grip.
408328

H. MANUAL INJECTOR NEEDLE GUN
41904

I. INJECTOR NEEDLES
Steel points are available with either stainless steel wire ties or brass wire ties (please specify when ordering).
42013 144/pk
42087 72/pk; With Hardened Point
Brass Only

J. TISSUE REDUCER & DRYER
The heat coupled with pressure helps to reduce swollen, edematous tissue areas; especially effective on eyelids, lips and other facial areas. Also useful in drying open tissue areas prior to applying sealants, adhesives, restorative waxes, cosmetics, etc. Wire safety rest holds hot instrument when not in use.
407844

**L. KELCO® THANATECH®
KEL-TISSU-FIL TISSUE BUILDER**
Free-flowing liquid formula restores natural contours and life-like textures to emaciated and/or dehydrated tissue areas. Hypodermic injection results in a gelatinous substance that shapes itself according to the technician's manipulation and placement. Remains hydrated and stable in position and shape; will not result in discolorations. A hazardous materials charge may apply.
50601 8 oz.
50768 16 oz.
50776 1 quart

M. KELCO® THANATECH® SOLVENT
Removes excess dry or wet Kelco® Skin Seal Liquid Pore Sealer or Kel-Tissu-Fil. 8 oz. A hazardous materials charge may apply.
50644

K. THROAT COLLAR
Latex collar is contoured to fit anterior and lateral aspects of the neck; ties securely with included nylon cord in desired position. Unit is filled with water of desired temperature and applied prior to, during or after the embalming procedure.
41637
