

**A. ULTRA CARE 4000™ BODY & CASKET LIFT BY FERNO®**  
 State-of-the-art, electrically powered hydraulic lift for bodies and caskets is manufactured using durable all-steel construction with a long-lasting powder-coat finish. The 24-volt battery offers smooth operating electric power that requires minimal effort for one person to maneuver. Load capacity of 750 lbs; manufacturer provides a three-year limited warranty on the actuator (motor and hydraulic lift component) and a one-year warranty on all other parts and services. Includes 24V battery charger and four 2"W x 81/2'L nylon web straps suitable for caskets and bodies. Optional hand-held remote control can be ordered and purchased separately. Shipped disassembled via truck.

**BODY & CASKET LIFTS**

The Sampson and Titan lifts are constructed of all-steel tubing and framework with an enamel finish; units come with a one-year manufacturer's warranty. Wheels on all models are heavy-duty rubber. Head, mid-body and foot straps on all models are washable 2" nylon web; each mid-body strap has an attached wand to pass underneath the body and then adjust to a variety of body girths. Please note: the Sampson model is designed for lifting bodies and caskets; the manufacturer does not recommend using the Titan model for lifting caskets. All models are shipped assembled via truck. Shipping weights are approximate.
