

## FLAT BRUSHES

Flat, wide bristle configurations make them ideal for the application of cream or liquid base cosmetics and as stippling brushes to achieve natural tissue textures and pore-consistencies on waxes and applied cosmetics. Ideal for the application of Skin-Seal Liquid Pore Sealer and other restorative or preparation room adhesives. Flat cosmetic brushes are available in a variety of bristle materials, bristle widths x lengths and total lengths to meet the individual requirements of the most skilled restorative art technician. All brushes are manufactured using quality craftsmanship techniques, artistic design standards and top-grade material specifications.
